Tel: 613-216-1823 Fax: 613-216-1824 Email: info@provisendoscopy.com

PLEASE REMEMBER TO:

- ⇒ Arrive 15 minutes before the appointment time
- ⇒ Bring your Ontario Health Insurance Card

⇒ Bring juice (Gatorade or Powerade) to drink after the procedure to restore energy

- ⇒ Wear loose fitting clothes (no tight jeans or similar tight attire) Bring an extra pair of loose fitted pants
- \Rightarrow Do not wear nail polish or hand cream
- ⇒ We generally do not use sedation for this procedure as it is a tolerable procedure
- ⇒ In the event that you are unable to tolerate the procedure or prefer to have sedation, you must arrange for someone to accompany you to and from the clinic as <u>you will NOT be</u> <u>allowed to drive for 24 hours or take public transit alone following sedation</u>. For safety reasons, the person will need to meet you inside the clinic. We will call a taxi for you and assist you downstairs, but you must be accompanied by a responsible adult

⇒ If you do not speak or read English, you must bring a translator. 如果你不说话或读英语 你必须带翻译。, Si usted no habla o lee Inglés, usted debe traer un traductor.

STEP BY STEP INSTRUCTIONS

Please read this entire information package NOW and READ AGAIN Seven (7) days prior to the appointment

PURCHASE THE FOLLOWING

2 FLEET ENEMAS at your local Drug Store

<u>PLEASE NOTE</u>: Diabetics, on insulin may buy 3 tins of Vanilla-flavored liquid meal replacement (Such as Ensure or Glucerna) the day before the procedure but not the day of the procedure

FOUR (4) DAYS BEFORE APPOINTMENT

4 Days before appointment: _____ 20_____

STOP eating ALL seeds and nuts. Including: multigrain breads, flax seeds, fruits with seeds (tomatoes, cucumbers, grapes, watermelon seeds, all types of berries etc.)

ONE (1) DAY BEFORE APPOINTMENT

Have a light lunch

2:00PM: YOU MUST REMAIN ON CLEAR FLUID ONLY. NO SOLID FOOD

 You may have CLEAR FLUIDS such as: Apple Juice, White Cranberry Juice, Ginger Ale, White Tea (NO black tea)

CLEAR FLUIDS ONLY

NO SOLID FOOD

DIABETICS: may take one (1) can of Vanilla flavored Ensure liquid meal replacement at each mealtime

** PLEASE NOTE: YOU MUST REMAIN ON A CLEAR FLUID DIET FROM THE DAY BEFORE AT 2:00PM UNTIL THE PROCEDURE IS FINISHED **

You must stop drinking all fluids two (2) hours before your appointment

THE DAY OF YOUR APPOINTMENT

- Two (2) Hours BEFORE you leave home, use the two (2) FLEET ENEMAS
- Insert the first enema into the rectum and squeeze all of it in be sure to hold it in for 5 10 minutes before going to the toilet to empty fully
- After the first enema has been emptied out, use the second enema the same way
- Lying down on your left side with knees to chest position is best to administer the enemas
- A spouse or someone you trust may be able to help you with administering the enemas as well

PROCEDURES WITH SEDATION

⇒ You will NOT be allowed to drive for 24 hours following sedation

⇒ You will require to have someone to accompany you to and from the clinic after your procedure

- ⇒ If you use a TAXI, you must be accompanied by someone
- ⇒ For safety reasons, the person will need to meet you inside the clinic as you cannot leave the clinic on your own

AFTER THE PROCEDURE

- If a polyp has been removed, <u>do not take aspirin for 3 days</u> or exercise strenuously for a few days after the examination
- You will remain in the recovery room for close observation for approx. ½ hour or longer
- A bloated feeling and flatulence can occur after the procedure if air was used to improve visibility. You can usually get rid of excess gas by sitting on the toilet and putting your head towards the floor
- You will be able to resume your normal diet after the procedure unless you are instructed otherwise

CANCEL OR CHANGE APPOINTMENT

If you need to cancel or change the appointment, you must do one of the following:

 \Rightarrow Call the Clinic:

Toronto 416-597-0997 Oakville: 905-607-0022 Mississauga: 905-607-0022 Ottawa: 613-216-1823

⇒ Email the clinic: www.ruddclinic.com/appointments.asp

⇒ We require Three (3) Business Days notice to cancel or change an appointment

WHAT IS A FLEXIBLE SIGMOIDOSCOPY?

Colon cancer is the largest cause of death from cancer in men who don't smoke and the 2nd largest killer in men and women who do. Colon cancer can now be prevented. Colonoscopy is the best cancer prevention examination for the colon available today. It is also used to discover, monitor and treat other diseases of the large intestine (colon). Flexible sigmoidoscopy is a simpler test that examines about 1/3 of the colon where at least ½ of the cancers may start. It is particularly useful if there is bleeding.

The purpose: We can find polyps early through the endoscope and **remove them before they turn into cancer.** This is **true cancer prevention.** It is 20 times better than the Pap Smear cervical test. Polyps (wart-like growths on the inside of the bowel) occur most commonly in the lower bowel and may be missed or be too small to be seen on x-ray. If an early cancer is found, it can usually be cured at this stage by operation. Therefore, we feel strongly that serious colon cancers are now preventable. But we do not want to wait for symptoms of a cancer to see a patient. We want to prevent the cancer from starting.

We use the latest generation video scopes. A video chip in the tip of the scope sends back a wireless video signal to the T.V. monitor. The tip can be turned 360 degrees, so the scope can be advanced around the curves in the colon. There is a channel for injecting air and water to clean the lens and another channel for suctioning air and fluid and for inserting biopsy forceps to take a bite out of a lesion and a snare to remove a polyp. This is making good use of new and, unfortunately, very expensive technology. The cramps or fullness that occurs during the procedure only lasts a few seconds and occurs as we progress around a corner. Compared to the advantages of cancer prevention, this amount of discomfort is certainly worth it!

Complications: (serious bleeding and perforation) are extremely rare — less than 1 in 4,000 examinations. This is far outweighed by the advantages.

The biggest disadvantage of the examination is the laxative – the colon must be clean, otherwise the procedure cannot be performed.

MEDICAL PRECAUTIONS

用药注意事项 Precauciones de Medicamentos Please carefully read these instructions if you are taking any of the medications below

Aspirin, Bufferin, Novasen NOTE: Confirm with your family doctor prior to discontinuing this medication. Discontinue the medication seven (7) days prior to the procedure. You may restart the next day if no biopsy was done. NOTE: Confirm with your family doctor prior to discontinuing this medication. Clopidogrel) Discontinue the medication seven (7) days prior to the procedure. You may restart the next day if no biopsy was done. NOTE: Confirm with your family doctor prior to discontinuing this medication. Discontinue the medication five (5) days prior to the procedure. You must have an INR test done before noon (12pm) the day before your procedure and have the results faxed to 905-607-0013 (Mississauga/Oakville) or 416-613-6044 (Toronto) or 613-216-1824 (Ottawa).
